Convertible Top Restoration

Member of the

KARMANN

Group

A completed 1979 Volkswagen Beetle with a canvas black color top.

About Us:

Karmann-built roof systems are known for their reliability and longevity. Still, after decades of operation, the roof system of an open-top vehicle may need some work.

With a great history of developing, engineering, and manufacturing quality products, Karmann USA wants to continue that tradition. Karmann Classics specializes in the restoration of convertible tops for the VW Beetle and the Karmann Ghia.

Trained by vintage experts from Wilhelm Karmann GmbH Germany, technicians provide this service at our restoration facility located in Plymouth, Michigan. This ensures the highest level of quality and craftsmanship for your top.

Range of Services:

- **Original Restoration**

If you are looking for the most authentic touch, as little as it may be, Karmann Classics can make your convertible top look like it just came off the dealer lot.

- **Custom Work**

Want to update the color or style of your top? Maybe you would like to change your headliner or even upgrade to custom chrome parts. Let Karmann Classics do it for you!

- **Repair**

Original tops may still be in great condition, except for a minor detail. Our experts may be able to repair it instead of replacing the whole top.

Price:

The price of any restoration work depends on the scope of work and the condition of the convertible top and vehicle. To be able to estimate the work involved in restoring your convertible top, a good first step would be for our technicians to take a look at it.

A certified technician works on the headliner and mattress pad for a 1974 Karmann Ghia.

Timeline:

Depending on the length of time it takes to get the correct parts, your top could take up to 2 weeks to complete.

At the end of the restoration process, you are presented with a certificate of authentication, the mark of quality restored by none other than those who built the original.

A Beetle frame is being prepped for paint before it undergoes a fitting for the canvas top.
